QUICKLOADER®

No more mess!

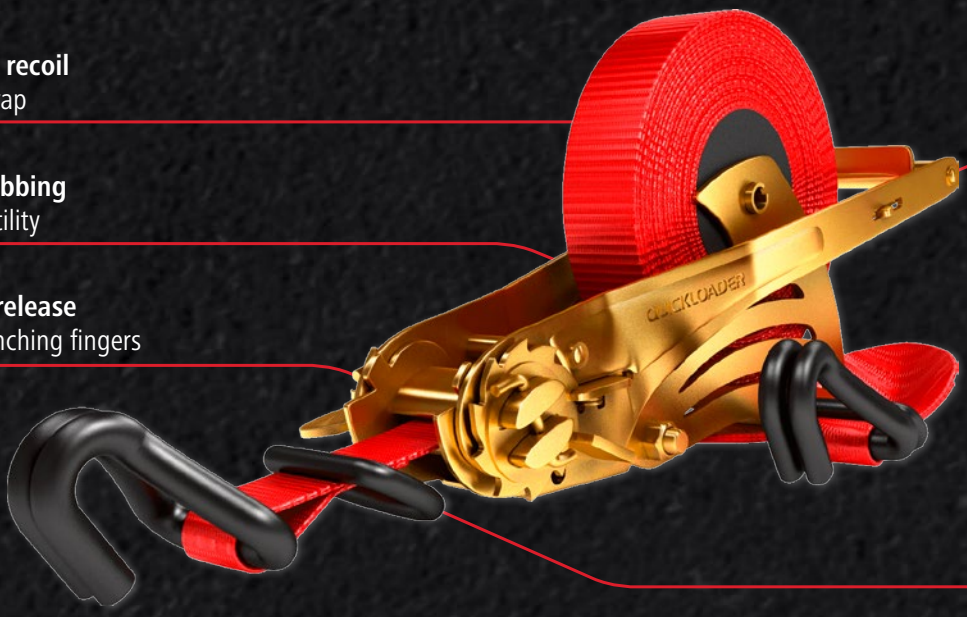

New at Kerbl!

QUICKLOADER Retractables

Unique, patented retractable tie-down. In addition to the advantages of conventional retractables (fast winding, tidy workspace), the QUICKLOADER series offers further benefits:

1. **Automatic recoil**
   no loose strap
2. **Longer webbing**
   great versatility
3. **Extended release**
   no more pinching fingers
4. **Longer handle**
   easier lashing
5. **D-rings**
   more anchoring options

1. • saves time • avoids "spaghetti" and dangerous loose webbing
2. • with up to 5.0 m in length, a load up to a max. of 3000 kg can be lashed
3. • only TÜV-certified retractable that is permitted to be used by a single person
4. • high pre-tensile force possible • easier and more secure lashing than with other automatic lashing straps • improved safety
5. • anchoring no longer just at lashing points, but also possible on beams and posts

Comparison: Regular lashing straps - QUICKLOADER

Step 1:
Feed the webbing through the locking mechanism, attach the hooks, ratchet the handle and tie up the loose webbing to secure the cargo

Step 1:
Attach the hooks and ratchet the handle to secure the cargo

Step 2:
Webbing out of the locking mechanism and roll up the webbing by hand to unload the cargo.

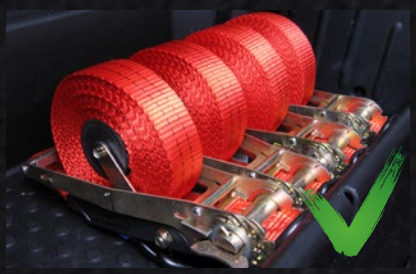

Step 2:
Release the handle to unload the cargo and the webbing retracts automatically.

Step 3:
In storage position it looks like spaghetti and needs to be untangled before they can be used again

Step 3:
The **QUICKLOADER** is always tidy and ready for use.

QUICKLOADER® STRAP

The versatile one

1001 applications - Your imagination is the only limit!

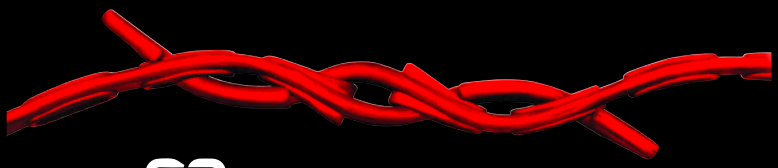

Link together
• all variants possible

Extandable
• when you need a bit more length

Easy locking
• self-locking
• no need for hooks

- black
- twin pack
- 110 cm length
- 50 kg permissible tensile force
- UV-resistant
- no over-tightening possible
- endless linkable, total flexibility
- no metal parts (hooks): no injuries, no scratches
