

Aesculap SnapOn blade sets

With our SnapOn precision blade sets, you obtain a range from the skin-tight 0.2 mm to the “curly” 9.5 mm.

New Wide Clipper Heads For Faster Results

Aesculap A5 type SnapOn blades

Precision from the profi, for the profi!

Blade set from Aesculap Schermaschinen are precision parts which aim at perfection. The blade set determines the performance of every clipper. The SnapOn blade set from the metal forge in Suhl/Thuringia are genuine “Made-in-Germany” products. Exceptionally high-quality cutting tools are manufactured from top-quality carbon blanks in several production stages, in compliance with medical technology directives. Except for the hardening process, the parts never leave the production facility.

This in-house production can only be to your advantage:

- **unmatched long cutting durability**, thanks to first-grade carbon steel
- **consistently high cutting capacity** of each individual blade set, thanks to state-of-the-art CNC grinding and milling equipment
- **exceptional coat gliding behaviour**, thanks to high-end surface finish
- **uniform and clean cutting pattern**, thanks to the specially developed tooth geometry
- **extremely regrindable, often up to 7 times**, thanks to the combination of material hardness, quality and manufacturing expertise

precise and consistent plate pressure for controlled heat generation

specially developed tooth geometry for precise immersion in the coat

Precision hollow-ground for the best clipping results

first-class raw materials for long-lasting cutting, and up to 7 regrinds

NEW DLC blade sets

The Aesculap “Diamond-like Carbon” (DLC) coating perfectly combines the property profiles of diamond- and Teflon-based surface enhancement.

This special coating guarantees outstanding product properties:

- high wear protection and longer service life
- excellent gliding thanks to minimised frictional resistance
- extended edge retention
- increased corrosion protection
- reduced care requirement thanks to dirt-repellent surface
- less heat development

exceptional coat gliding behaviour due to high-end surface finish

Changing the blade set

Removing the blade set:

1. loosen the blade set lock by pressing the push button
2. press against the blade set from the front to tip it backwards
3. pull the blade set out of the blade hinge

Attaching the blade set:

4. place the blade set on the blade hinge
5. switch on the machine
6. press the blade set forwards until it clicks

Important: the machine must be turned on so that the rocker arm can snap into the blade set.

If it does not snap in, you will hear a “rattling” sound and the blade set will not cut.

Tip: If the blade hinge for the blade set is accidentally tipped, you can loosen it again using a screwdriver.

Cleaning and caring for the blade set:

GT604 Aesculap Oil
GTA103 Aesculap Blade Cool 2.0

We recommend oiling the blade set before each grooming session. You can both reduce heat build-up and clean at the same time with the Blade Cool. Use this at least every 10 minutes. Oiling during clipping also improves the cut and extends the sharpness of the blade set.

Durati

All round professional cordless clipper

Aesculap Durati

Cordless clippers with Removable Battery for SnapOn Blade sets

- best value for money
- Aesculap Performance
- for all-round clipping of dogs and small animals

Features:

- Battery run time: up to 4 hours
- Battery charge time: 240 minutes
- Battery capacity: 2850 mAh
- new li-ion battery technology (fast charge and durable)
- lightweight – just 380g including blade set and battery
- very quiet – noise level only 63 dB

Included in delivery:

- 1 x cordless clippers Durati,
- 1 x blade set (GT330),
- 1 x Aesculap oil (GT604),
- 1 x power pack with interchangeable plug (EU, UK, US, AUS),
- 1 x charging station,
- 1 x instruction manual

The Durati cordless clippers are made with the proven Aesculap quality. These universal clippers with their standard SnapOn blade set system (compatible with manufacturers like Heiniger, Oster, Wahl and Andis) boasts an unbeatable price/performance ratio. With a balanced weight of just 380 g including battery and blade set, and its lithium-ion battery that enables up to 4 hours of cutting, the Durati provides low-fatigue clipping. A second battery guarantees permanent continuous operation. Effortless clipping with no annoying cables!

An optional and extensive SnapOn blade set range means you can clip all kinds of coat types and up to 9.5 mm.

Use the optional stainless steel clip-on combs and you can even clip up to 32 mm.

When using the stainless steel clip-on combs, you should always add the blade set's "mm" to the comb you are using: e.g. GT330 #10 1.5 mm + GTA134 comb 16 mm = 17.5 mm cutting length result.

The stainless steel clip-on combs boast improved smoothness and durability as opposed to conventional plastic clip-on combs. They keep their shape and allow you to achieve cutting lengths you can't achieve just with blade sets.

You can purchase the Aesculap stainless steel SnapOn combs as a set of 9 in a practical case (GTA129) or individually.

The following sizes are available:

For SnapOn clipping heads GT317, GT326, GT330 and GT333

| | | |
|--------|------------|-------|
| GTA130 | red | 3 mm |
| GTA131 | violet | 6 mm |
| GTA132 | blue | 10 mm |
| GTA133 | brown | 13 mm |
| GTA134 | yellow | 16 mm |
| GTA135 | purple | 19 mm |
| GTA136 | green | 22 mm |
| GTA137 | light blue | 25 mm |
| GTA138 | black | 32 mm |

New: wide design for SnapOn cutter heads

GT397, GT398 and GT399

| | | |
|--------|--------|-------|
| GTA144 | brown | 13 mm |
| GTA145 | yellow | 16 mm |
| GTA146 | orange | 19 mm |

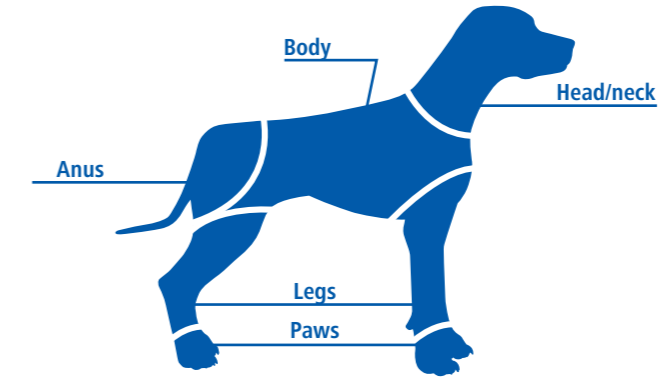

Which blade set should I use for which coat?

The blade set advisor for SnapOn blade sets (A5 type)

It is important to use the right blade set for each coat type and for the various parts of an animal. There is a wide range of Aesculap SnapOn blade sets available.

These figures are indicative and based on experience; coat structures can vary by individual animal. We recommend analysing the coat structure before each use of the clippers.

| Dog breed | Mixed breeds | Mixed breeds | Poodle | Bichon | Doodle | Maltese | Pomeranian | Collie |
|-------------------------|------------------------|---------------------------|---|---|---|---|------------------------|---|
| Coat structure | Mixed fur | Mixed fur | | | | Havanese | | with undercoat |
| | normal coat structure | matted coat | normal coat structure | normal coat structure | normal coat structure | normal coat structure | normal coat structure | normal coat structure |
| body short coat | GT345 = #7F 3,2 mm | GT345 = #7F 3,2 mm | GT360 = #5F 6,3 mm | GT364 = #4F 9,5 mm | GT360 = #5F 6,3 mm | GT360 = #5F 6,3 mm | GT345 = #7F 3,2 mm | GT360 = #5F 6,3 mm |
| body medium-length coat | GT360 = #5F 6,3 mm | only short shear possible | GT364 = #4F 9,5 mm | GT330 = #10 1.5 mm + GT133 = 13 mm clip-on comb | GT364 = #4F 9,5 mm | GT364 = #4F 9,5 mm | GT360 = #5F 6,3 mm | GT364 = #4F 9,5 mm |
| body long coat | GT364 = #4F 9,5 mm | only short shear possible | GT330 = #10 1.5 mm + GT133 = 13 mm clip-on comb | GT330 = #10 1.5 mm + GT136 = 22 mm clip-on comb | GT330 = #10 1.5 mm + GT133 = 13 mm clip-on comb | GT330 = #10 1.5 mm + GT133 = 13 mm clip-on comb | GT364 = #4F 9,5 mm | GT330 = #10 1.5 mm + GT133 = 13 mm clip-on comb |
| special areas anus | GT333 = #9 2 mm | GT333 = #9 2 mm | GT333 = #9 2 mm | GT333 = #9 2 mm | GT333 = #9 2 mm | GT333 = #9 2 mm | GT333 = #9 2 mm | GT333 = #9 2 mm |
| special areas paws | GT320 = #5/8 0,8 mm | GT320 = #5/8 0,8 mm | GT320 = #5/8 0,8 mm | GT320 = #5/8 0,8 mm | GT320 = #5/8 0,8 mm | GT320 = #5/8 0,8 mm | GT320 = #5/8 0,8 mm | GT320 = #5/8 0,8 mm |
| Legs | GT357 = #5 6,3 mm | GT357 = #5 6,3 mm | Scissors VH016C or VH017C | Scissors VH016C or VH017C | GT357 = #5 6,3 mm | Scissors VH016C or VH017C | GT357 = #5 6,3 mm | Scissors VH016C or VH017C |
| Head - neck area | GT345 = #7F 3,2 mm | GT345 = #7F 3,2 mm | Scissors VH016C or VH017C | Scissors VH016C or VH017C | GT345 = #7F 3,2 mm | Scissors VH016C or VH017C | GT345 = #7F 3,2 mm | Scissors VH016C or VH017C |

What is so special about Aesculap clipper products?

Aesculap Clippers are:

- very robust and reliable
- can manage even difficult coats
- high-quality components and processing
- Made in Germany

...and the blade sets and clipping blades have the following advantages:

- the best clipping properties
- long-lasting cutting performance
- the best clipping properties
- can be resharpened up to 7 times
- long-lasting cutting performance
- can be resharpened up to 7 times
- the development and production of the machines and blade sets at Aesculap Schermaschinen GmbH in Suhl
- the development and production of the machines and blade sets at Aesculap Schermaschinen GmbH in Suhl

Aesculap clippers – quality from Germany – since 1912

Got questions about our clippers?

Our product experts will be pleased to answer all of your questions about the types of machines, shearing blades and the professional use of the equipment.
