Functionality is of the utmost importance in equestrian sports. Every single garment has been designed with great attention to detail to satisfy even the most demanding riders. We therefore focus on technologically advanced materials and thoughtful practical details in our **Autumn/Winter 2023 Collection**. Covalliero riding jackets not only offer optimal weather protection, they also allow unrestricted freedom of movement in the saddle. The breathable fabrics from which our breeches are made ensure a comfortable feeling no matter what the temperature.

Our **parka** is a special highlight. The lush padding and a highly water-repellent outer material offer you perfect protection against cold, wind and rain. A riding slit with press studs gives it freedom of movement. The hood protects you from all weathers, while the adjustable cuffs allow for an individual fit.

Our classic is the **Active Shirt**. It convinces with a super elastic material and a body-hugging cut. An athletic look combined with unbeatable comfort. The fluffy soft inside of the shirt increases the wearing comfort enormously. It adapts to every movement and makes a fashion statement with the stand-up collar.

Our **long waistcoat** is another highlight of this collection. The generous padding keeps you warm, while the feminine, fitted cut conveys timeless elegance. The detachable hood allows you to adjust the appearance as you wish. The riding slit allows perfect freedom of movement and pleasant wearing comfort.

At Covalliero, it is important to us that our customers feel good. In our collections and as consumers. For this reason, we have made greater use of sustainable materials in our **Autumn/Winter 2023 Collection**. This way, you can live out your passion for equestrian sports with us and at the same time make a small contribution to a more responsible use of resources and the environment.
