Stylish warmth for you and your horse: Discover the Covalliero Autumn/Winter 2026 collection, combining style, functionality and comfort

Our new Autumn/Winter 2026 collection invites you to enjoy your everyday riding in style, warmth and comfort – whilst experiencing the special bond between people, horses and nature.

Harmonious colour palettes meet modern accents that lend every look a unique touch. The depth of forest floors, the gentle morning mist and the energy of a sunset – with the colours **dark navy, black, milky chocolate, forest green, beige and orange**, the collection captures the mood of the autumn and winter months.

The **silhouettes** are both comfortable and functional: oversized styles such as the **Teddy Sweater** are perfect for feeling cosy, whilst the **Covalliero Riding Tights** and the **Riding Breeches HighWaist** combine optimal warmth, unrestricted freedom of movement and stylish elegance.

Equestrian fashion with a feel-good factor: oversized comfort, warmth and autumnal colour accents in dark blue, forest green and more.

Heating function and power bank compatibility: The Combi waistcoat Heat for cosy winter hours in the stable

An absolute highlight of the collection is the **Combi waistcoat Heat**, a heated vest. It provides targeted warmth, making it the perfect companion for cold days in the stable. The vest can be conveniently powered by any standard power bank – practical, innovative and stylish all at once.

Padded blouson: Feminine, unrestrictive and perfect for active days

Our new **blouson** is the perfect choice. With its modern cut and soft padding, it's ideal for active days at the stables: it keeps you comfortably warm without restricting your movement, and its feminine look makes it a hit even away from the riding arena.

Reflective headbands, belts and more – stylish accessories that serve a practical purpose

Matching accessories, such as a **scrunchie, belts in three colour combinations**, as well as **headbands and caps**, complete the outfit and add stylish yet functional touches. New to the collection: the **headband with a reflective logo appliqué**. It is extra-thin and seamless, with a clever cut-out for a ponytail. This makes it particularly comfortable to wear, even under a helmet.

Warmth and protection for your horse: outdoor, transport and cooler blankets in seasonal colours, featuring innovative 3-layer technology

Outdoor and horse blankets in autumn/winter colours

For horses too, **Covalliero** offers an exclusive range of accessories in its current Autumn/Winter 2026 collection that combine style and function – perfectly coordinated with the collection's colours: thoughtfully designed **outdoor and horse blankets** with a variety of fillings ensure a harmonious partnership between rider and horse and guarantee an elegant appearance even on frosty days.

Transport and cooler blanket made from 3-layer fabric

Another highlight is the new **Covalliero transport and cooler blanket**, which offers optimum protection and maximum comfort after training or during transport.

The **3-layer fabric** ensures optimal **temperature regulation**: the functional structure quickly and effectively wicks moisture away to the outside, ensuring the fabric stays dry and preventing heat build-up. At the same time, the padded middle layer acts as insulation and provides reliable protection against the horse getting cold – even in changing temperatures.

Find your new favourite item for both rider and horse, all from the comfort of your own home
