

RUTLAND GOES SMART

ESD 12000 SMART

- 12/230 Volt DUO Unit – maximum flexibility combined with powerful output
- Our all-round device for more demanding mobile or static applications - ideal for horses, cattle and sheep
- Can be used with medium to heavy vegetative growth
- 3.2 Output Jules at low output level
- 5-year warranty

recommended solar module: 375559 (55 Watt), connection directly to the 12-Volt battery, ideal with ground anchor 442382

- Optimised consumption thanks to energy saving mode – saves battery power in fences in good condition. Also intelligent battery management for when battery voltage decreases.
- Deep discharge protection for the 12 volt battery
- Microprocessor controlled
- High safety in line with the latest safety standards
- Incl. free app download
- With High/Low/OFF switch for 2 different output powers
- Robust, impact-resistant, UV-resistant and weather-resistant housing thanks to the use of high-quality plastics
- Solar backup possible
- Integrated hanging device for wall mounting
- Corresponds to applicable EU safety standards
- Ref. no. 481979

Benefits of the app:

- FREE app for your mobile phone
- no follow-on costs at all for the functions provided by the app
- Permanent, free mobile transfer of data from the Smart Energizer to the app!
- an unlimited number of smart devices and users can be managed using the app
