

Calf housing

Animal welfare regulations

Suitable in accordance with animal welfare regulations

National regulations specify how long calves can be kept in which minimum areas. Our calf houses and boxes, as well as our modular fence stabling, comply with these specifications and are perfectly designed to meet the requirements of calf rearing.

Single housing					
	Designation	Single Calf House PE UV+ (14566, 14570), Premium Plus (14580, 14585), Master Plus (14470, 14485)	Calf Box Small (14610)	Calf Box Large (14611) and Premium (14616)	Modular calf box single free-standing (14626), wall-mounted (14627)

Modular Calf Box

The new modular calf boxes from Kerbl give you maximum flexibility and efficiency of labour. The boxes can be stacked free-standing or attached to a wall. The panels are quickly and easily set up by a single person, and can be combined into one or more boxes. You can start with individual pens, and easily create small groups by removing the side walls between adjacent boxes. Dismantling and cleaning are just as quick as they are easy. The handles on the panels are large enough to fit onto pallet forks. The panel surfaces are easy to clean. The new unique stacking system allows space-saving sorting and storage of the panels, including the door element.

- new unique stacking system
- one box offers approx. 1.8 m² of space (1.60 x 1.15 m)
- up to three boxes can be combined to create a group bay
- robust plastic with stiffening ribs
- easy-to-clean walls with smooth surface
- social contact opening in the area of the side walls allows the calf contact with other calves
- front element with swivel-mounted revolving door and fixed drinking area, perfect for teaching calves to suckle
- includes a watering bucket mounting bracket and two foldable bucket brackets
- carrying handle for manual transport
- Box assembled / disassembled in a few simple steps
- Can be transported with pallet forks
- single-handed unlocking
- no need to drill holes in the floor for fastening

Calf Box Premium with Swivel Floor

Thanks to the swivel floor, the Calf Box Premium can be quickly mucked out and conveniently cleaned. Lowering the front loader automatically locks the folding floor. The two-part door is ideal for teaching calves to use the feeding pail. The farmer can leave the box without disturbing the calf as it drinks. The calf box ensures that the calf enjoys plenty of fresh air, but is not exposed to any draughts. It is also protected from harmful pathogenic bacteria. The animal does not lie directly on the floor in the calf box, but rather on the raised grille. This keeps the calf warmer and dryer.

- stable, hot dip-galvanised metal frame
- GRP base grille (two-part) offering excellent grip and anti-slip properties
- easy-to-clean side walls made from PVC panels with smooth surface
- social contact opening in the area of the side walls allows the calf contact with other calves
- inwards and outwards swinging door with single-handed door operation
- two-part revolving door
- includes a watering bucket mounting bracket and two foldable bucket brackets
- the folding handles on the front make moving the box exceptionally easy
- folding base for fast cleaning, with automatic locking
- Can be transported with pallet forks
- transport device optionally available
- Bucket not included
- Comes disassembled

Local animal protection regulations must be observed!
Please note separate freight costs.

Calf box

The calf box ensures that the calf enjoys plenty of fresh air, but is not exposed to any draughts. It is also protected from harmful pathogenic bacteria. The animal does not lie directly on the floor in the calf box, but rather on the raised grille. This keeps the calf warmer and dryer. The calf box is available in two sizes.

- stable, hot dip-galvanised metal frame
- GRP base grille (two-part) offering excellent grip and anti-slip properties
- easy-to-clean side walls made from PVC panels with smooth surface
- the open gap in the upper area of the side walls allows the calf to have visual contact with its neighbours
- revolving door which opens in both directions
- includes a watering bucket mounting bracket and two foldable bucket brackets
- Feeding places can be individually blocked
- folding handle on the front make moving it exceptionally easy
- transport device optionally available
- Can be transported with pallet forks
- roof optionally available
- Bucket not included
- Comes disassembled

Kerbl CalfHouse

The ideal home for calves

Calf houses combine all the advantages to give calves the best possible start. The houses offer protection from all kinds of weather at all times of the year. At the same time, air circulation is promoted by the rising roof slopes and ventilation openings, which reduces germ pressure and creates the best possible micro-climate. The run offers outdoor climate stimuli and expands the generous space. **Calf houses from Kerbl are therefore also suitable for use in organic livestock farming without any restrictions!**

In science and practice, calf houses are considered the best housing system, both during individual and group housing.

protected and spacious

optimal climate – both in summer and winter

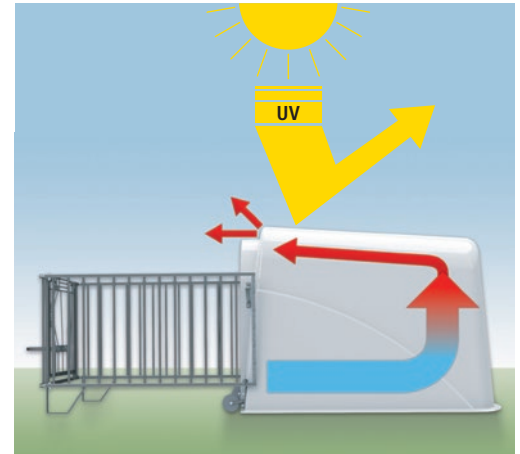

- high insulation and UV protection due to high-quality materials
- promotion of air circulation through the shape of the house and removal of moist warm air
- white surfaces prevent heating up

animal-friendly design

- large amount of space
- fence with minimal spacing between the vertical struts and side guards to prevent injuries
- smooth interior surfaces prevent licking of material fibres, facilitate cleaning and thus significantly improve hygienic conditions

Robustness

- high-quality materials ensure breakage safety and impact resistance as well as a long service life for the calf house
- uniform wall thickness and side stability arches increase static stability and also offer additional torsional stiffness
- robust, hot-dip galvanised fencing
- side guards provide the fencing with additional stability

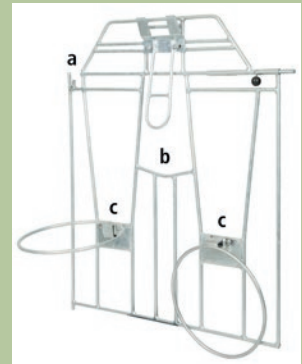

Comfort for humans and animals

Practical, convenient and multi-functional

- Fencing can be folded over the calf house to clean the forecourt
- The revolving door can optionally also be placed in the calf house entrance to lock the calf in
- Calf house can be moved forward into the fence for scattering litter, cleaning and moving
- Large solid rubber tyres with needle bearing enable easy moving even with difficult ground conditions
- Handle for easier lifting of the house
- Threshold at the house entrance stops litter getting out
- Floor-level threshold at the fence enables unobstructed entrance for people and animals
- Side guards stop calves from slipping through and lend additional stability

Multifunctional revolving doors:

- Flex rail (a) with drinking bucket and bucket safety catch (b), 2 feed openings (c), with hinged bucket holders for feed buckets
- The high position of the feed bucket promotes the natural stretching of the neck, so that the milk can pass directly into the abomasum.
- The bucket's inclined position ensures it is fully emptied
- Flex rail for variable mounting of the bucket holder and the optional dry feed bottle holder

Lightweight or heavy fence

The fencing is available in a lightweight design for all single-calf houses. The reduced weight makes it easier to lift the fence and to reposition the house integrated in the fence, while also offering a high degree of stability.

In the case of the CalfHouse Premium Plus, CalfHouse Master Plus and CalfHouse PE UV+, the fencing can also be supplied in a heavyweight design. It is extremely robust and its increased weight offers even greater static stability.

CalfHouse PE UV+

High stability and durability are ensured because it is made from high-quality, impact-resistant HDPE plastic with integrated UV stabilisers. The hut entrance threshold, reinforced with steel tubes, ensures a high level of stability. Optimal climate control of the Calf House is achieved via the adjustable ventilation flap that can be fixed at all levels. This also makes it easy to fill the Hay Rack. The especially smooth interior surfaces make cleaning child's play and thus improves hygiene.

- increasing roof slope with ventilation openings ensure optimum air circulation so that humid air can heat escape at the top
- pure white surfaces prevent overheating of the interior space
- additional UV stabilisers prevent the calf house heating excessively and reduce the natural degeneration of the material
- Bucket, feed box and hay rack not included

Suitable in accordance with animal welfare regulations:

Our calf houses and boxes comply with animal welfare regulations and have the optimum design for the requirements of calf rearing. Find out more online at www.kerbl.com

CalfHouse Premium Plus

More space! More stability!

This Calf House, increased in both length and height, offers the calf improved protection from the weather and gives farmers more space when handling the calf. The CalfHouse Premium Plus is built using special fibreglass material with a very high surface mass. This gives it excellent resistance against tears and impacts. The wall construction is also additionally reinforced in all edge areas and in the corners of the calf house. The easy-to-clean plastic barrier improves hygiene. This Calf House also has an optimal ventilation system that regulates the climate in the house without any draughts. Bucket not included

CalfHouse Premium XL

The multi-animal Calf House made from glass fibre reinforced plastic offers space for up to 5 calves (local animal protection regulations must be observed). A sliding window is placed at the back to make animal control and filling the optional hay rack, among other things, easier. The additional reinforcing frame around the Calf House ensures the highest stability. The Calf House with fence provides optimum oversight and makes animal control easier.

- Feeding places can be individually blocked
- Side grilles can easily be swung back against the cabin walls
- easy access via large entrance door, even a calf transporter fits through the door
- pre-drilled holes on runners for straw catching and floor securing
- house and fence easy to transport with a tractor
- Feeding bucket and long feeder troughs not included

Catch grille:

- with 5 feeding places
- with catch system: individual and complete locking possible
- lockable, fold-up drinking bucket holder, also length and height-adjustable
- adjustable feeding place width
- incl. trough holder
- catch grille width information: with drinking bucket holder, max. length

14520: Included: Hut incl. reinforcing frames and fencing, eyebolts, wooden sleeper, drinking bucket holder and two trough holders for long feed troughs (item no. 3268).

Vielseitig und robust

Side and catch grilles can be arranged as required

The reinforcing frame gives the house additional stability

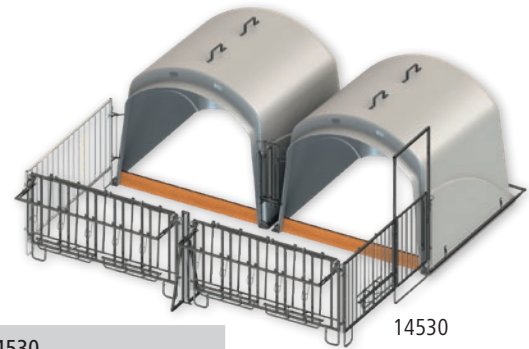

Catch grille can be hung back on the house

Twin set, CalfHouse Premium XL with fence (item no. 14530)

- Also available as a twin set for up to 10 calves
- Tip: With an additional fence component, the twin set can quickly and easily be divided into two bays.

The multi-animal Calf House made from glass fibre reinforced plastic offers space for up to 5 calves (local animal protection regulations must be observed). A sliding window is placed at the back to make animal control and filling the optional hay rack, among other things, easier. The additional reinforcing frame around the Calf House ensures the highest stability. The Calf House with fence provides optimum oversight and makes animal control easier.

- Feeding places can be individually blocked
- Side grilles can easily be swung back against the cabin walls
- easy access via large entrance door, even a calf transporter fits through the door
- pre-drilled holes on runners for straw catching and floor securing
- house and fence easy to transport with a tractor
- Feeding bucket and long feeder troughs not included

14520: Included: Hut incl. reinforcing frames and fencing, eyebolts, wooden sleeper, drinking bucket holder and two trough holders for long feed troughs (item no. 3268).

CalfHouse Premium XXL

The large-area Calf House made from glass fibre reinforced plastic offers space for up to 7 calves (local animal protection regulations must be observed). The additional reinforcing frame around the Calf House ensures the highest stability for even large animals. The swivelling ventilation slots control the air circulation in the back area of the Calf House. A sling bar is attached at the house roof ridge to enable easy lifting and transporting. The Calf House with fence provides optimum oversight and makes animal control easier.

- Feeding places can be individually blocked
- Side grilles can easily be swung back against the cabin walls
- easy access via large entrance door, even a calf transporter fits through the door
- pre-drilled holes on runners for straw catching and floor securing
- house and fence easy to transport with a tractor
- Feeding bucket and long feeder troughs not included

Catch grille:

- with 7 feeding places
- with catch system: individual and complete locking possible
- lockable, fold-up drinking bucket holder, also length and height-adjustable
- adjustable feeding place width
- incl. trough holder
- catch grille width information: with drinking bucket holder, max. length

14540: Included: Hut incl. reinforcing frames and fencing, sling bars, wooden sleeper, drinking bucket holder and four trough holders for long feed troughs (item no. 3268).

Versatile and robust

Side and catch grilles can be arranged as required

The reinforcing frame gives the house additional stability

Catch grille can be hung back on the house

House and fence easy to transport with a tractor

Optional feeding space separation

Suitable in accordance with animal welfare regulations:

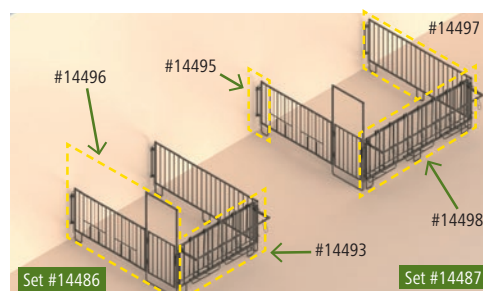

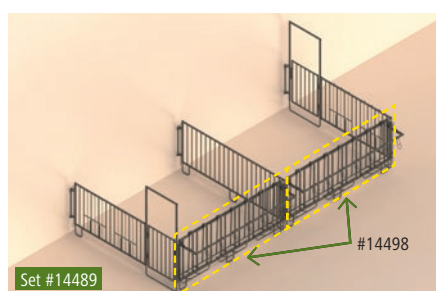

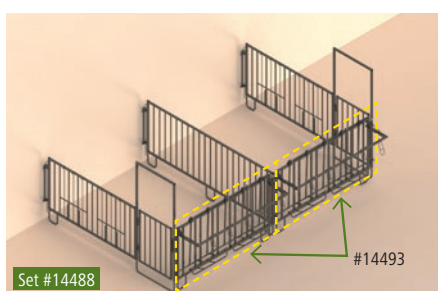

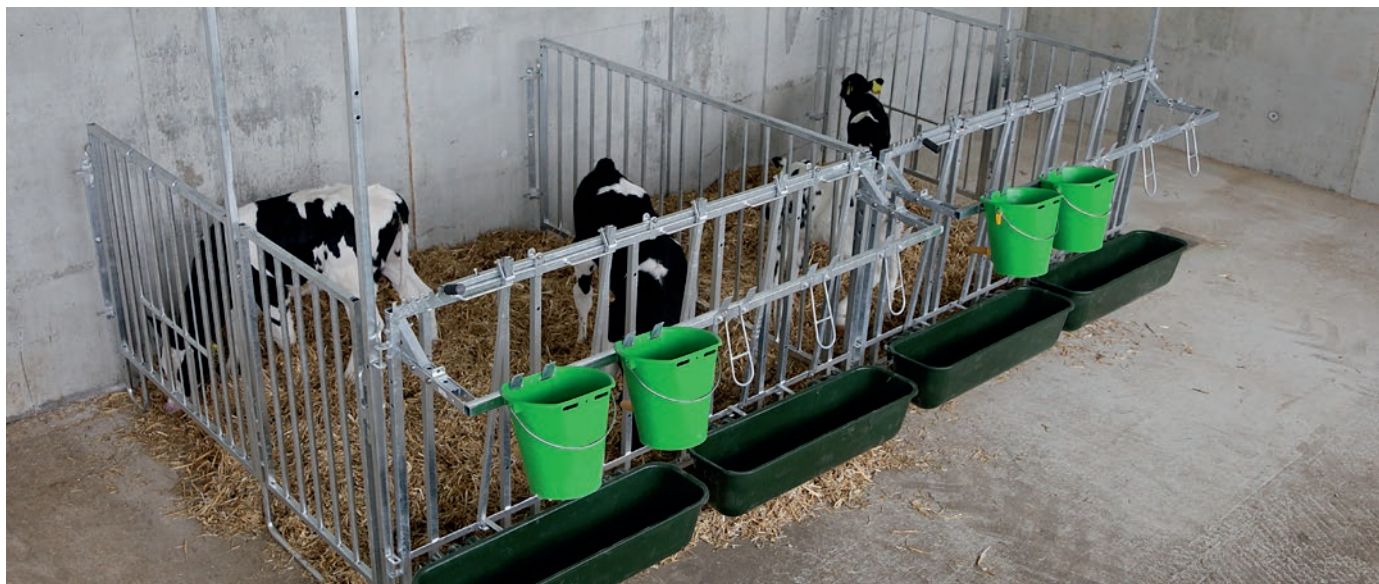

Our calf houses and boxes comply with animal welfare regulations and have the optimum design for the requirements of calf rearing. Find out more online at www.kerbl.com

Local animal protection regulations must be observed!
Please note separate freight costs.
A front-loader with forklift will be required for unloading!

Modular fence stabling

flexible accommodation for calves – creation of (small) groups is simple and cheap

Modular fence stabling gives you the option of housing your calves at low cost in small or larger groups. Roofed areas, halls, or stalls are outstandingly suitable locations. You know the functionalities from the Premium XL and XXL large hutches.

• Kerbl offers four preconfigured sets, for 3, 5, 6, and 10 calves (1.7 m² per animal from 220 kg live weight)* • Bucket and long feeder trays not included.

14486 Includes: 2 x 14495 (wall bracket), 1 x 14496 (fence part with gate, long), 1 x 14497 (fence part grille, long), 1 x 14493 (5-pce safety grille)

14487 Includes: 2 x 14495 (wall bracket), 1 x 14496 (fence part with gate, long), 1 x 14497 (fence part grille, long), 1 x 14498 (7-pce safety grille)

14488 Includes: 3 x 14495 (wall bracket), 2 x 14496 (fence part with gate, long), 1 x 14497 (fence part grille, long), 2 x 14493 (5-pce safety grille)

14489 Includes: 3 x 14495 (wall bracket), 2 x 14496 (fence part with gate, long), 1 x 14497 (fence part grille, long), 2 x 14498 (7-pce safety grille)

* Sample calculation based on the legal requirement of 1.7 m² per animal, from a weight of 220 kg and upwards (German Order on the protection of animals and the keeping of production animals – TierSchNutzTV). Your responsible veterinary inspection office can provide further information.

Occupational items for calves

The purpose of occupational items is to calm their unmet desire to suckle and provide an outlet for their energy. They also help to prevent misbehaviour (e.g. mutual suckling). Calves' acceptance and interest in these items is very high and also long-lasting. The calves like playing and busying themselves with the various toys.

'Toys for young animals' immediately create a positive and friendly impression in the calf shed.

Feed Ball Toy

- the Food Play Ball must be used only in the stable, pasture, or paddock, and under supervision*
- with 19 feed openings
- durable UV-resistant plastic
- for up to 3 kg of hay
- Filled via 116 mm filling opening with screw cap
- can also be hung on a cable or chain
- for safe use as an occupation, we recommend hanging attachment using the universal belt (3226434)

3210384: 40 mm feed openings especially suitable for small horses

- Calves enjoy playing with the swinging ball or eat hay from it
- Suitable for group housing
